

Benchmarking P2C for HPC

Joseph Anthony C. Hermocilla

December 23, 2016

Abstract

We report some results of benchmarking P2C for HPC using NPB 3.3.1.

1 Introduction

In order to evaluate the performance of P2C for applications, NPB Benchmark applications were tested. A 16-node cluster was deployed using vcluster.

2 NPB Benchmark Applications

2.1 CG

See the code for [Figure 1](#) in this section for an example.
